

## 2019 CCA Self-Assessment Items

To receive credit, complete the self-review located in the CEU center. Any manually submitted self-review documentation will not be accepted.

1. What is the diagnosis code assigned for dandruff in an adult patient?
  - a. L30.5
  - b. L21.0
  - c. L21.9
  - d. L30.8
  
2. A 30-year-old patient was seen in the ED for gastrointestinal bleeding. A colonoscopy was performed and a diagnosis of arteriovenous malformation of the small bowel was documented as the cause of the bleed. What diagnosis code is assigned for this case?
  - a. K55.20
  - b. Q27.33
  - c. K55.21
  - d. K31.811
  
3. Mrs. Smith presents to the doctor's office with severe neck pain. After evaluation, the physician documents a diagnosis of cervical spine stenosis with myelopathy. What diagnosis code(s) is/are assigned?
  - a. M50.00
  - b. M48.02, G95.9
  - c. M47.12, G99.2
  - d. M48.02, G99.2
  
4. Mary presents for her regular monthly OB office appointment, she is in her second trimester. After the provider has completed the visit, he documents 'cannabis use during pregnancy' in Mary's chart. What diagnosis code(s) is/are assigned?
  - a. O99.322, F12.90
  - b. O99.320, F12.90
  - c. O99.322
  - d. F12.90
  
5. A patient presented to the ED with severe abdominal pain and was determined to have acute perforated appendicitis. She was admitted for appendectomy. What diagnosis code(s) is/are assigned?
  - a. K32.32, R10.9
  - b. K35.32
  - c. K35.80
  - d. K35.80, K35.32

6. A children's hospital admitted a newborn from another hospital at 3 days old to see a specialist for his microcephaly. The diagnosis the specialist documented 3 days later at discharge was microcephaly due to congenital Zika virus infection. What diagnosis code(s) is/are assigned and the sequencing?

- a. Q02, P35.4
- b. P35.4
- c. A92.5, Q02
- d. P35.4, Q02

7. A five-year-old presented to the ED after jumping off the top of a slide and hurting his foot. The ED physician evaluated him and documented Type I Salter-Harris physeal fracture of the 2<sup>nd</sup> metatarsal bone, right foot. What diagnosis code(s) is/are assigned?

- a. S92.321A, S99.111A
- b. S99.111A
- c. S92.321A
- d. S99.112A

8. Dr. Smith performed a colonoscopy and listed a 'sessile serrated polyp' as a finding in the descending colon. What diagnosis code is assigned for this finding?

- a. D12.4
- b. K63.5
- c. D12.2
- d. K51.40

9. 91-year-old Mrs. Jones presented to her Primary doctor's office with right knee pain and swelling. The doctor documented pseudogout of the right knee. What diagnosis code is assigned for this condition?

- a. M10.9
- b. M10.061
- c. M11.261
- d. M11.20

10. The physician documents a diagnosis of 'alcohol abuse and withdrawal' in his discharge summary. What diagnosis code(s) is/are assigned?

- a. F10.239
- b. F10.19
- c. F10.239, F10.10
- d. F10.10

11. A patient presented to the outpatient surgery unit for eyebrow surgery based on the diagnosis of bilateral brow ptosis. What diagnosis code(s) is/are assigned?

- a. H57.811, H57.812
- b. H57.813
- c. H02.403
- d. H57.89

12. Advanced degenerative changes of both ankles is documented in the office note completed by Dr. Smith. What diagnosis code(s) is/are assigned?

- a. M19.079
- b. M89.8X7
- c. M19.071, M19.072
- d. M25.877, M25.872

13. A 37-year-old female is admitted with nausea and vomiting, as well as dysphagia and heartburn. Imaging shows stenosis of her gastric band. The patient was taken to surgery and the fluid displacing the band was completely evacuated via needle aspiration at the band port. Once the fluid was removed, imaging indicated the band was back in its correct position. What is the correct ICD-10-PCS code?
- 0DS64ZZ
  - ODN63ZZ
  - ODW63CZ
  - OD9630Z
14. A 59-year-old male presents with a right-sided L3-4 synovial cyst compressing the nerve root and causing significant radiculopathy. He is taken to the operative suite, prepped and draped, and an incision was made at the L3-4 level. A laminectomy was performed to expose the cyst, and the cyst was dissected away from the exiting nerve root obtaining complete decompression. What is the correct ICD-10-PCS code?
- 01NB0ZZ
  - 00NY0ZZ
  - 01BB0ZZ
  - 00BY0ZZA
15. 13-year-old male presents with a ruptured globe after being hit in the eye with a baseball during practice at school. A 10 mm laceration was noted extending from the upper medial portion of the left cornea to the lower lateral cornea with extension into the sclera with vitreous extrusion. The vitreous was trimmed, and the cornea and sclera repaired with sutures. What is/are the correct ICD-10-PCS code(s) for this procedure?
- 08Q1XZZ
  - 08Q7XZZ, 08Q9XZZ
  - 08Q10ZZ
  - 08Q70ZZ, 08Q90ZZ
16. Patient presents for planned ORIF of the radius after traumatic fracture. The right elbow was prepped and draped. Incision was made over the radial head. Upon opening the joint compartment, the fracture was found to be irreparable, so the decision was made to replace the radial head. The neck of the radius was cut and the pieces of the radial head removed. A metal prosthetic implant was placed. What is the correct ICD-10-PCS code for this procedure?
- OPSJ04Z
  - OPSH04Z
  - OPRJOJZ
  - OPRHOJZ
17. What is the correct ICD-10-PCS code for the intramuscular injection of the flu vaccine?
- 3E01340
  - 3E013GC
  - 3E02340
  - 3E0234Z
18. This 2-year-old male is referred for SLP therapy due to unintelligible speech following bilateral cleft palate repair six months prior. Treatment will focus on learning techniques for speech intelligibility at an age-appropriate level. What is the correct CPT code?
- 92507
  - 92507-96
  - 92508
  - 92508-96

19. A 47-year-old male presents for resection of a portion of the duodenum. An incision is made in the abdomen and 3 cm of the distal duodenum is resected with a side-to-side duodenojejunostomy anastomosis. What is the correct CPT code?
- 44120
  - 44125
  - 44126
  - 44130
20. Patient comes to ED after falling and catching himself with his right hand, now having severe pain in his hand and wrist. CMC joint x-ray is performed. What is the correct CPT code?
- 73120
  - 73100
  - 73130
  - 73110
21. A 58-year-old female presents with a hiatal hernia and severe GERD. She is taken to the endoscopy lab where a magnetic sphincter augmentation device is placed, and the hiatal hernia is reduced and suture repaired. What is/are the correct CPT code(s)?
- 43284
  - 43281
  - 43284, 43281
  - 43284, 43281-59
22. A 26-year-old female presents for C-section delivery of a single live female infant. Prophylactically, both fallopian tubes are excised for cancer prevention during the C-section. What is/are the correct CPT code(s) for this encounter?
- 59514, 58700-59
  - 59514, 59525
  - 59514
  - 58700
23. Patient presents for transsphenoidal endoscopic skull base procedure performed by co-surgeons from neurosurgery and ENT. What is the correct CPT code?
- 62165-62
  - 62165
  - 64999-62
  - 64999
24. Patient presents for repair of the shoulder anterior labrum along with debridement and removal of a loose body measuring 7 mm. Procedure is performed arthroscopically. What is/are the correct CPT code(s)?
- 23455, 29819
  - 29806, 29819
  - 29806
  - 29819

25. Patient comes to the Pain Management Clinic for trigger point injections. Patient receives an injection in the left multifidus muscle, bilateral trapezius muscles and bilateral levator muscles. What is the correct CPT code?
- 20552
  - 20552-50
  - 20553
  - 20553-50
26. A 63-year-old female presents with a stress fracture of the medial tibial plateau. The surgeon performs a percutaneous arthroscopically assisted internal fixation and injection of calcium phosphate to fill the bone marrow lesion. What is the correct CPT code?
- 29850
  - 29851
  - 29855
  - 29856
27. A 59-year-old male presents with herniated disc and myelopathy at C3-4. He is also noted to have some kyphosis at C4-5. An incision is made in the left side of the neck and carried down through the muscles to expose the anterior cervical vertebra. A discectomy is performed at C3-4. BMP mixed with morselized cadaveric bone is then placed in the interbody spaces from C3-5. What is/are the correct CPT code(s)?
- 22551, 22552-52, 20930
  - 22551, 20930
  - 22554, 22585-52, 20930
  - 22544, 20930
28. A new Medicare Code Editor edit created under the Hospital Inpatient Prospective Payment System for Fiscal Year 2019 is:
- Questionable Obstetric Admission
  - Principal Diagnosis Is Its Own CC or MCC
  - Manifestation Code as Principal Diagnosis
  - Non-Covered Procedure
29. In the Fiscal Year 2019 Hospital Inpatient Prospective Payment System Final Rule, CMS explained how the MS-DRG Grouper logic edits for data integrity.
- True
  - False
30. Which of the following is an accurate statement about the coding of lysis of adhesions in the hospital outpatient setting?
- Lysis of adhesions should always be coded when documented.
  - Lysis of adhesions should be coded when the adhesions are documented as extensive.
  - Lysis of adhesions should be coded when performed in conjunction with certain procedures.
  - Lysis of adhesions should never be coded because it is inherent in the primary procedure performed and not separately reported.
