Brief History of HIPAA Transactions and Code Sets Rule

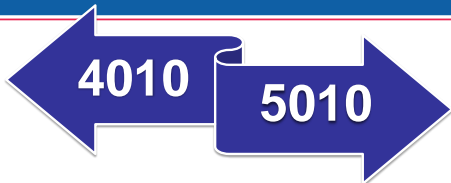

2009 HIPAA Modifications Rule

- Version 5010
- Version D.0 for retail pharmacy
- Version 3.0 for Medicaid pharmacy subrogation

2

- Version 5010 of HIPAA transaction standards will replace the existing Version 4010/4010A1
- Compliance date is January 1, 2012

Version 4010 does not accommodate ICD-10 code sets. Version 5010 must be implemented so ICD-10-CM/PCS codes can be reported.

Synopsis of Version 5010

- Technical issues were corrected and other improvements were made
- Greater specificity and clarification of instructions
- Increases the field size for ICD codes from 5 bytes to 7 bytes
- Ability to distinguish whether ICD-9-CM or ICD-10-CM/PCS codes are reported on claim
- Permit separate diagnosis code reporting by principal Dx, admitting Dx, E-codes and reasons for visit
- Better accommodation of POA indicator reporting

5010 - What Needs to Be Done?

- Formats must be upgraded from X12 Version 4010A1 to 5010
- Systems must be analyzed to identify what changes are needed to software and processes
- Changes to software and processes must be implemented
- Testing efforts must be coordinated with other covered and non-covered entities
- Form an implementation team on ICD-10 and 5010 for planning and implementation
- Contact system vendors to determine what their plan of action is
- Include compliance with 5010 in contracts
