

Privacy Officer

We are seeking a privacy officer to oversee privacy-related activities in our health organization. This individual will be responsible for providing guidance in the identification, development, and implementation of privacy-related policies and procedures, performing initial and periodic risk assessments; ensuring the delivery of ongoing privacy-related training to all members of the workforce; establishing and administering a complaint process; ensuring compliance with privacy laws and standards; and reviewing information security plans.

The successful candidate will possess RHIA or RHIT certification; be familiar with federal and state privacy laws and regulations; have demonstrated project, change, organization, facilitation, communication, and presentation skills.

Interested applicants should send resumes to...
