Previous industry patterns of cooperative federal assistance for compliance issues and low incidence of breach penalties have paralleled frequent media stories of lax interpretation and management of breach activity. This session will review changing industry enforcement activity and offer participants insights into how to weave readiness into privacy and security risk assessments and compliance monitoring programs.
<b>3:15 p.m. – 3:30 p.m.</b>	<b>Networking Break</b>
<b>3:30 p.m. – 4:30 p.m.</b>	<b>Synching Up: Privacy and Security Programs: Working Together to Optimize Confidentiality</b> All Faculty CEUs: 1 Achieving privacy and security compliance is an ongoing challenge, perhaps made more so, by a tendency toward silo management of privacy and security programs within healthcare organizations. Privacy might be thought of as the administrative, human aspects while security is technological. Yet their goal is the same -- confidentiality of patient health information. This session addresses the symbiotic opportunities and benefits that come from synching up the two programs. Attendees will take away key insights on how and where operational and compliance advantages can come from program integration.
