(AHIMA)

AHIMA Standards Products and Services Catalog

**Chicago, Illinois
2017**

ABOUT AHIMA

The **American Health Information Management Association (AHIMA)** represents more than 103,000 health information professionals in the United States and around the world. AHIMA is committed to promoting and advocating for best practices and effective standards in health information and to actively contributing to the development and advancement of health information professionals worldwide. AHIMA is advancing informatics, data analytics, and information governance to achieve the goal of providing expertise to ensure trusted information for healthcare. www.ahima.org

ABOUT AHIMA STANDARDS TASK FORCE

As part of the Information Governance Initiative, the **AHIMA Standards Task Force** has been leading the development of health information management (HIM) practice standards as well as guiding the development of health information technology (HIT) standards for information systems to support HIM needs.

The **AHIMA Standards Task Force** collaborates with leading international standards development organizations (SDOs). They include:

- **International Organization for Standardization, Technical Committee 215 Health Informatics (ISO/TC215)**. Since 2011 AHIMA provides Secretariat to ISO/TC215 and serves as Administrator to the US delegation at ISO/TC215 - US Technical Advisory Group (ISO/TC215 USTAG)
- **Integrating the Healthcare Enterprise (IHE) International**
- **Health Level Seven (HL7) International**

JOIN AHIMA STANDARDS TASK FORCE

Please e-mail standards@ahima.org to participate in the **AHIMA Standards Task Force**

EXECUTIVE SUMMARY

This document presents the **catalog of products and services** developed by the AHIMA Standards Task Force members and AHIMA Standards staff (AHIMA Standards).

The AHIMA Standards Task Force is a collaborative of over 60 volunteers (health information management (HIM), clinical and public health professionals, researchers and other health information technology (HIT) stakeholders) who are interested in standardization of HIM practices and HIT as well as overall advancement of HIM professional practices in the electronic health (eHealth) environment.

Built from the AHIMA's strategic Information Governance (IG) initiative (<http://www.igiq.org/>), the AHIMA Standards has been collaborating with various standards development organizations [International Organization for Standardization, Technical Committee 215 Health Informatics (ISO/TC215), Integrating the Healthcare Enterprise (IHE), HL7 International and other] to develop HIM practice standards and guide the development of technical HIT and informatics standards for trusted information sharing across interoperable health information systems.

In addition, AHIMA Standards focuses on workforce development. In this regard, our standards products and services include informational and education resources about HIM, HIT and informatics standards and standardization processes in healthcare to support the needs of HIM professionals in implementing and using HIT products including electronic health record (EHR) systems, ancillary systems and mobile health (mHealth) applications.

The **target audience** for AHIMA Standards products and services includes

- (1) HIM, clinical, public health and HIT professionals employed in healthcare organizations, governmental agencies, research institutions, academia and vendor organizations; and
- (2) Those involved in the standards development activities for HIM, HIT and informatics at the various standards development organizations (SDOs).

The **catalog** is organized to present the AHIMA Standards products and services in the following way:

- **AHIMA Standards Products**
 - Publications
 - Public Comments
 - Webinars, Workshops, Educational Sessions, Exhibition Presentations (User Stories)

- **AHIMA Standards Services**
 - AHIMA Standards
 - Informational Resources
 - Educational Resources

AHIMA STANDARDS PRODUCTS

JAHIMA Publications

AHIMA Standards publishes articles and practices briefs in the Journal of AHIMA (JAHIMA) for the annual Standards Issue, November-December of each year as well as for the monthly JAHIMA Standards Strategy Column.

Informational Resources

AHIMA Standards develops informational fact sheets (flyers) and news releases about AHIMA Standards activities and projects. The fact sheets are disseminated at the various AHIMA events, e.g. Convention, Leadership Symposium and other venues. The news releases are circulated via various communication channels to inform the healthcare industry about AHIMA standards development achievements.

Educational Resources

AHIMA Standards develops educational resources (briefs, catalogs, web-based publications, etc.) to inform members about the world of standards. These resources are distributed at the various AHIMA events, e.g. Convention, Leadership Symposium and other venues.

AHIMA Standards website provides AHIMA members and other stakeholders with informational and educational resources on HIM, HIT and informatics standards; AHIMA standards projects and services; and opportunities to participate in the AHIMA standards development activities with the AHIMA Standards Task Force.
