

## Corrections

*Basic ICD-10-CM and ICD-10-PCS Coding, 2022*

AHIMA Product # AC200521

The first printing of this book contained an error in chapter 4, page 137. The Check Your Understanding feature listed answers for questions 1 through 5. This has been corrected in subsequent printings to the following:

**Check Your Understanding 4.5**

Assign the following diagnosis codes in relation to COVID-19.

1. Patient was admitted for pneumonia due to COVID-19 which then progressed to viral sepsis. How should this be reported?
2. Patient presented with fever and shortness of breath, suspected COVID-19.
3. Patient is tested for COVID-19 due to suspected exposure. However, the test comes back negative but positive for lower respiratory infection.
4. Adolescent admitted for MIS-C with COVID-19.
5. ARDS due to COVID-19 infection.

The new questions have been added to the full CYU answer key (available only to instructors) posted on [ahimapress.org](http://ahimapress.org).
