Certified Health Data Analyst (CHDA) Exam Preparation, Second Edition

AHIMA Product # AC400717

Practice Exam 1, Question 129, p.30. Answer choice c should state “DNFB cases met the benchmark 83% of the time.”

The rationale in the answer key (p. 106) should read: “The facility needs to have DNFB less than two days of net revenue, or $2 \times 1,750,000 = 3,500,000$. They only exceeded that value in April, so they met the benchmark 5/6 months, or 83% of the time.”

Practice Exam 3, Question 74, p. 129: The correct answer choice is b, narrower.
